

Honeymoon Data Dashboard

Group Members	Molly, Rhi, Sheila L., and Tazia.
Summary	Interactive dashboard for information on potential honeymoon destinations.
Data Sources	OpenWeatherAPI- current weather data TripAdvisorAPI- reviews on destinations Numbeo- Costs for travel, lodging, food and attractions Kaggle, DataWorld
Analytics Goals	Connect metrics in weather, travel cost, lodging cost, and review scores for lodging and food into one interactive dashboard. Aimed at honeymooners but accessible and inclusive for people just looking to take a great vacation as well.
Timeline & Outline of Work Responsibilities	4/10- Project proposal agreed to, timeline worked out, submit proposal 4/12- All data sources identified, data collected, finalize dashboard plan 4/13- Work on data normalizations, integration and building SQL db 4/17- Work on Flask API and building Dashboard 4/19- Fine tune Dashboard, write out 'speech' notes, finish README 4/20- Presentation Day
Proposed Benefit	An interactive and fun way to visualize your perfect honeymoon destination, helping easily compare how potential places stack up in several categories.
